Established Hydro Electric Power Plants [80M KWh] with a capacity of 24.9 MW will be built in the East Kazakhstan region. This Power Plant produces up to 80 million kilowatt hours of electricity per year. This hydro power plant produces energy for local families and reduces carbon dioxide emissions by 680 tons per year. To date, all the infrastructure required for the hydro power plant has been built – roads, power lines, bridges. Kazakhstan could provide itself completely with self-produced energy. The total production of all electric energy producing facilities is 101 bn kWh, which is 107% of the country's own usage. Despite this, Kazakhstan is trading energy with foreign countries. Along with pure consumptions the production, imports and exports play an important role. Other energy sources such as natural gas or crude oil are also used. POF Required to get access to the Data Room.
